

Minutes M.D. Council of St. Andrew's No. 47

The regular meeting of the Council of the Municipal District of St. Andrew's, No. 47, was held at the municipal office, Morrin, on Tuesday, July 13th, 1937, at 10:00 a.m.

Members present as follows: Reeve Nelson, Deputy Reeve Nelson, Councilors Chambers, Brown, Perry.

Minutes of regular meeting of June 11th were read and approved, on motion of Reeve Nelson.

Mr. S. G. Phillips, of Minto, was present and discussed with Council the matter of ditch through NW 30-31-34.

Moved by Deputy Reeve Nelson and carried that the Publishers, Drumheller Mail, pay \$1.50 per subscription per annum, at from July 1st, 1937, and that a by-law be passed amending by-law No. 226.

Moved by Mr. 278 was seconded that three readings and passed unanimously.

Moved by Councilor Chambers that application of Imperial Oil Limited to construct a new gas station in NE 24-31-17-4, adjacent to S. G. Phillips, be approved subject to report on improvement on access road from S. Highway to the Village of Minto.

Moved by Councilor Perry and carried that Robert Hunter, Minto, be exempted to keep dredge ditch in NW 30-31-34 open at a fee of \$200.00 per annum, commencing in the year 1938.

Moved by S. G. Phillips, be approved subject to report on improvement on access road from S. Highway to the Village of Minto.

Supervisor Robertson reported on the activities for the past month. He advised that the \$20 million of road allowances have been approved to date. Mr. Robertson discussed with Council the matter of purchasing a new of public truck for use in the water conservation project.

Moved by Councilor Brown and carried that the Treasurer be authorized to purchase a new of public truck for use in the water conservation project.

Moved by Councilor Chambers and carried that the Treasurer be authorized to purchase a new of public truck for use in the water conservation project.

Moved by Councilor Brown and carried that the Treasurer be authorized to purchase a new of public truck for use in the water conservation project.

Moved by Councilor Chambers and carried that the Treasurer be authorized to purchase a new of public truck for use in the water conservation project.

Moved by Councilor Brown and carried that the Treasurer be authorized to purchase a new of public truck for use in the water conservation project.

Moved by Councilor Chambers and carried that the Treasurer be authorized to purchase a new of public truck for use in the water conservation project.

Moved by Councilor Brown and carried that the Treasurer be authorized to purchase a new of public truck for use in the water conservation project.

of \$25.00, and that the necessary by-law be passed.

By-law No. 276 was seconded that three readings and passed unanimously.

Moved by Councilor Brown and carried that the Canadian Red Cross Society be granted the sum of \$50.00, to be divided equally between the Delia and Morrin branches of the said Red Cross Society, and that the necessary by-law be passed.

By-law No. 277 was seconded that three readings and passed unanimously.

Moved by Deputy Reeve Nelson and carried that the Canadian Mental Health Association be granted the sum of \$50.00, and that the necessary by-law be passed.

By-law No. 278 was seconded that three readings and passed unanimously.

Moved by Councilor Chambers and carried that the Farmers Union of Alberta be granted the sum of \$25.00, and that the necessary by-law be passed.

Moved by Councilor Brown and carried that the necessary by-law be passed.

Moved by Councilor Chambers and carried that the necessary by-law be passed.

Moved by Councilor Brown and carried that the necessary by-law be passed.

Moved by Councilor Chambers and carried that the necessary by-law be passed.

Moved by Councilor Brown and carried that the necessary by-law be passed.

Moved by Councilor Chambers and carried that the necessary by-law be passed.

Moved by Councilor Brown and carried that the necessary by-law be passed.

Moved by Councilor Chambers and carried that the necessary by-law be passed.

Moved by Councilor Brown and carried that the necessary by-law be passed.

Moved by Councilor Chambers and carried that the necessary by-law be passed.

Moved by Councilor Brown and carried that the necessary by-law be passed.

SHIFTS FROM BUSHELS TO HUNDREDSWEIGHTS

In view of the interest that is now being taken in Canada with respect to the possible shift from the bushel to the hundredweight in the measurement of grain, the progress along these lines being made in the U.S.A. is being watched closely. Recently, a committee of U.S. Department of Agriculture experts made its report which presents the views of representatives of farm organizations, elevator men, grain dealers, bankers, government statistical workers, and other interested groups.

After discussion in some detail the major advantages and some of the disadvantages which such a change would bring, the report went on to state that there was general agreement that the advantages would be lasting while the disadvantages would disappear in a very short time. It was also felt that at least a year of advance notice of any such change would probably be necessary to give the principal farm organization there are said to support the change. And some of the grain industry too are behind the move, although the U.S. grain trade itself has been somewhat cautious in its approach to the question.

The matter is proving so close a question in Canada. It is probable, however, that some more in the direction of the substitution of the hundredweight for the bushel, whether here or in the U.S.A., will be a gradual one.

FEEDING GROWING TURKEYS

Ontario, July 6, 1937.—Returns from the raising of market turkeys depend to a great extent upon such factors as mortality, speed of growth, and the quality of the birds. Proper diet and feeding practices have a direct bearing upon each of the above factors. Turkeys which get a diet which contains all of the essential for rapid growth can reach mature condition with which there are no incidents. This can be done in lower mortality and a larger percentage of marketable birds.

The most economical gains are made during the early months of growth. This is the most active period in a well balanced diet is consumed. Birds which do not receive the proper levels of protein, vitamins and minerals during this period will not develop the large well built bodies which are necessary to market at a high percentage of market returns.

It has also been demonstrated at the Experimental Farm, Swift Current, that turkeys which receive a properly balanced diet will mature and lay on a good market finish at an earlier age than those birds on a diet containing almost entirely grain.

A difference of even one week in reaching maturity will market an enormous feed saving. The last few weeks before marketing are by far the most expensive so far as feed costs are concerned.

At this time the feed gains without very readily. Each additional week required to fatten birds will result in lower net returns.

The most common method of fattening an adequate diet for growing turkeys on the prairie is to provide brown grown grain supplemented with a protein-vitamin-mineral concentrate.

This concentrate may be purchased in powdered or pellet form. It is powdered form is mixed with ground grain to make a mash, which is then fed in conjunction with whole grain. It has been shown at this Experimental Farm that this concentrate can be pelleted and mixed directly with whole grain to make up a proper diet.

The pelletizing usually leads to the automobile in a race to beat the market; and to other jobs life as well.

JEAN RAMSAY

Severe Precipitation Report

Compiled from the records of Government and Weather Bureau, Calgary, Alberta, from July 1st to July 15th, 1937.

Station which covered in Western Canada during the week ending July 15th made in the form of thunderstorms, was extremely varied, ranging from nothing at all to some districts to several inches at certain points in the Peace River Area, Southern and Central Saskatchewan, and parts of Manitoba.

With temperatures in all three provinces well above normal, amounts for crops which needed little or no rainfall decided appreciable, although those on summer-fallow land held up unusually well in the face of declining available moisture supply.

Estimated season rains from April 1st to July 15th now stand at 65 per cent of normal in the west of Alberta, 69 per cent of normal in the center of the province, and 105 per cent of normal in the east of Manitoba, giving a weighted average for the three Prairie Provinces of 71 per cent of normal.

The total overall moisture condition of the three Prairie Provinces, which takes into account the moisture that accumulated in the soil during the growing season on stands of summer-fallow, now stands at 92 per cent of normal, compared with 95 per cent last week, and 99 per cent at this time a year ago. Respective figures for the three provinces are as follows: Alberta, 94 per cent of normal; Saskatchewan, 95 per cent of normal; and Manitoba, 105 per cent of normal.

Proper diet and feeding practices have a direct bearing upon each of the above factors. Turkeys which get a diet which contains all of the essential for rapid growth can reach mature condition with which there are no incidents. This can be done in lower mortality and a larger percentage of marketable birds.

BOYS AND GIRLS!

Plan to enroll now for advanced vocational training in Agriculture or Home Economics at the Schools of Agriculture at Olds, Vermilion or Fairview.

- No Tuition Fee.
- Board and Room only \$10.00 a month.
- Full extra-curricular Program in addition to class work.

For full particulars write to:

The Principal, School of Agriculture, at Olds, Vermilion or Fairview; or The Superintendent of Schools, Department of Agriculture, Edmonton.

GOVERNMENT OF ALBERTA

DEPARTMENT OF AGRICULTURE

H. L. CHALMERS, Minister. R. M. FETTER, Deputy Minister.

Pools Urge Advances

The three prairie Wheat Pools have appealed to the federal government to make cash advances on farm-frozen grain available to prairie farmers.

Walter Turnbull has been appointed minister to the vice president of operations, Canadian National Railway, with headquarters at Montreal.

St. J. Gunning has been appointed manager of the CNR's Bismarck Hotel at Saskatoon. He succeeds Claude Pilon who is retiring at the end of June.

C.N.R. Appointments

The average investment per job to new plant and equipment—about \$1,000, the average cost of creating one new job in manufacturing in Canada today—is more than ten thousand dollars.

CNR museum train coming here in July

The Canadian National Railway museum train will be on exhibition in Humboldt July 20 and 21 as a part of its western tour in Montana, Saskatchewan and Alberta. The train is made up from equipment built in the last century, three locomotives, one built in 1872, three cars, converted into museum halls for the display of material on Canadian railway history, an 1860 passenger coach, dining car of the 1880s, and a general service car built about 1890.

The Grand Trunk Railway played an important part in Canada's early railway history and its locomotives the first main line, first passenger car and one of its subsidiary cars built the first sleeping car west ahead of Pullman. Railroad was born in Canada in 1836. Locomotive No. 40 heads the museum train, and behind No. 16, No. 247—a Walker "radial locomotive" engine which was reconstructed from abandonment in a scrap pile.

It is the only railway museum on wheels and on the first visit to the West it opened in Winnipeg the first of the week where it is drawing huge crowds of interested citizens.

The following is the schedule for the train's Saskatchewan tour: Regina, Estevan, July 4; Weyburn, July 5 and 7; Regina, July 9 to 11; Moose Jaw, July 13 and 14; Saskatoon, July 16, Kamloops, July 18.

Humboldt, July 20 and 21; Melville, July 23; Prince Albert, July 25 to 28; Saskatoon, Aug. 1 to 4; Regina, Aug. 6 and 8; North Battleford, Aug. 9.—The Journal, Humboldt, Sask., June 29, 1957.

New beach resort on Dauphin Lake open this spring

By last night of 14 beach lots at the new resort opened up this spring by E. H. Thayer, Clarkson and J. J. Joe' Nott at Crescent Lake, a new beach has been opened. The beach is in varying stages of construction and in the past month or so, a lot of work has been done, all hammer and thumb.

Moore, Clarkson and Nott purchased the property, one known as Sunshine Beach, from Leonard, Thayer, Clarkson and Nott. The first thing they did was have the land divided into beach lots. The first road into the beach, just 100 yards past Ochre Beach has been applied for improvement under the province's beach improvement plan.

Unused for years, there is a 1,000-foot beach frontage, of which 1,000 feet is taken up by the 14 lots. The hydro has been brought to the beach and all surveying and building construction is under the supervision of the Municipal Engineer, Planning and Development, Mr. J. J. Joe' Nott, at Dauphin. —The Herald News, Dauphin, Man., June 20, 1957.

New Church to Be Dedicated Sunday

Work having been completed in the new Evangelical Free Church, located on the south side of Tabor, special dedication services will be held on Sunday at 2:30 p.m.

The opening will be marked with the presence of a guest speaker and special musical numbers will be rendered. Open house is also being held on Saturday from 9 to 5 p.m.—The Times, Tabor, Alta.

225 Teachers attend Steinbach local here

One hundred and twenty-five teachers of the Steinbach local of the Manitoba Teachers' Society met at Steinbach on Friday, May 31 for the forty-third anniversary. At a dinner prepared and served by the staff of Steinbach School, the teachers heard a program of music, also presented by some of the teachers, and recitation speeches by men who took an active part in the early activities of the local. —The Carlton News, Steinbach, Man.—June 7, 1957.

The grade fish or angel fish of the Atlantic ocean is almost certainly poisonous and highly prized for food. 2203

High School Students Enjoy Trip to Bismarck

Forty-three Bismarck High School students and four chaperones left Regina at 8 o'clock Friday, May 24th, bound for Bismarck. After a rather rough ride on highway 10 we arrived at the American border, where the American customs officer said to us on our way with his good wishes. We arrived in Minot, N.D., for lunch. Here we made up to get our money changed at 3% premium. At 2:30 we arrived at Bismarck and went directly to the Patterson Hotel.

This hotel is the "Pride of North Dakota," being the largest in five western states with 216 rooms.—The Recorder, Bismarck, N.D., May 30, 1957.

Stoney Lake site interests church

Interest in obtaining property at Stoney Lake by the Church of Jesus Christ Latter Day Saints was reported at Monday night's meeting of the Town Council.

It was learned that registered land had been received by the Mayor and Town Clerk regarding the possibility of acquiring property adjacent on which to erect 20 cottages. The location opportunity in said is the property which fronts on the main beach and which includes the old pump house building. It was stated in a letter received by Mayor Leitch that the property would be fully developed and landscaped.—The Journal, Humboldt, Sask.—May 16, 1957.

The true measure of a people lies not alone in its material wealth and in the might of its arm, but in that pursuit of liberty and learning without which no nation can achieve greatness.

Crowd acclaims Elks first annual Spring Young Festival a success

That there will be no second year program in the city of Estevan "the three or four year" was predicted by Alderman E. J. Pettigrew Friday night at the regular meeting of the city council.

Speaking during the discussion on the report of Alderman Harold Chakay's public works committee, Alderman Pettigrew said that "let's face some simple facts about this party, talk and realize one and for all that there won't be enough money to go around the economy and leave anything for paving projects."

Alderman Chakay, in a verbal report for his committee, suggested that some thought should be given by the council to setting up a definite program for construction of curbs and sidewalks and paving streets.

Alderman Pettigrew added further comment that he was "not in favor of programming anything in the future of paving until proper street levels are established and the grade constructed to these levels."

Chamber float invites everyone to Selkirk's 75th

The Selkirk chamber of Commerce entered a float in the Lions Club International Convention parade which was held in Winnipeg last week, inviting everyone to attend Selkirk's 75th Anniversary Celebration. The float which depicted Selkirk's history of industry will be used in the Anniversary parade here on June 26. —The Enterprise, Selkirk, Man.—June 12, 1957.

Canada is a vast country, bounded by 3 mighty oceans. Its rich lands are traversed by majestic mountain ranges, watered by powerful rivers and millions of lakes. Six provinces have joined the nucleus of the original union.

Plans to be submitted to local government

Alderman Frank Marwood plans to discuss the construction of a new road and certain gas lines with the local government. "This year is now half gone and certain gas lines have been done so let's advance our intentions now for both this year and next year."

July 1, 1867 - July 1, 1957 Canada Celebrates 90th Birthday

In Canada, a young people has since 1867 been steadily working in way toward a national consciousness. The really vital task since Confederation has been the creation of a great nation from the diverse elements which

statesmanship brought together into a central parliament. From a bold dream, the Fathers of Confederation fashioned a practical plan which through the years has welded 10 far-flung provinces into a powerful nation.

Canada is a vast country, bounded by 3 mighty oceans. Its rich lands are traversed by majestic mountain ranges, watered by powerful rivers and millions of lakes. Six provinces have joined the nucleus of the original union.

Man and animal projects, such as the Canada Drive at Muskrat, India, testify to Canada's growth in the realm of international responsibility.

National Film Board of Canada Photos

A recent count reveals a population five times the figure for 1867. This has resulted not only from the birth of new babies but through the influx of eager new citizens whom older countries have, during the decades,

sent for the peopling of a new world, abounding in opportunity. Canada's story since Confederation has been one of continuing growth in the wide areas of activity by which a young country moves toward maturity.

MISDETERMINED INDIGNATION
Righteous indignation is
admirable, provided it is not
misdirected. Probably the
best example of misdirected
indignation is that indulged in
by socialists and others about
profiteering.

It would be a lot more useful
if folks who rant and rave
about the supposed iniquity of
profiteers would not later find
themselves at the head of the
crowd about the obstacles which
prevent some industries from
being profitable. For unprofitable
industries cannot contrib-
ute much to tax revenues,
cannot create more and better
jobs, and cannot meet the
demands of consumers for
better goods at lower prices.
It was one of North
America's great labor leaders,
the late Samuel Gompers, who
recognized the importance of
profits to economic growth
and material wellbeing when he
said, "The worst enemy of
the workman is the com-
pany that fails to make profit."

Poor management can
destroy profits. But by far the
most frequent cause of unprofit-
ability are excessive wage
demands, high taxation, and
excesses of industrial and
other tax hamper industries
in their efforts to meet com-
petition.

CANADA'S EXTERNAL ECONOMIC POLICY

Compelling evidence of ur-
gency of re-examining Cana-
da's external economic policy
is found in balance-of-pay-
ments and trade figures for
first quarter of 1957 and for
month of April. Balance-of-
payments deficit for first
quarter, according to DBS,
was \$409,000,000, as compared
with \$383,000,000 for first
quarter of 1956. Almost
three-quarters of this \$46,000,000
increase in balance-of-
payments deficit is attributed
by DBS to rise in merchandise
imports, which for first
quarter of 1957 were 7 per cent
above figure for corresponding
quarter of 1956. Gain in
merchandise exports, according
to DBS, lagged sharply
behind gain in imports, with
value increase of only slightly
more than 3 per cent for first
four months of 1957, over
corresponding period of last
year. In month of April, ex-
ports were actually 4.6 per
cent below exports for April,
1956.

Canadian exports to UK,
other Commonwealth countries
and US of April all fell below
level of same month last year.
Export gains were recorded
only in Latin America and in
continental Europe. Exports to
all other countries, though
up over last year for first four
months of 1957, fell sharply
in April, with biggest record-
ed drop being in exports to
Japan.

U.S. department of agriculture has
agreed to maintain average export
prices under quotas at 13.7¢ per
bushel. But quotas have rejected
this price would have drop-
ped to 11.5¢.

Vote For Quotas

On June 20 the U.S. wheat farm-
ers on whether or not they wished
the continuation of quota marketing
in 1958. They voted more than
90 per cent in favor of it.
U.S. department of agriculture has
agreed to maintain average export
prices under quotas at 13.7¢ per
bushel. But quotas have rejected
this price would have drop-
ped to 11.5¢.

Calgary, visiting with them
for a couple of weeks.

Marlene Delham, nurse-in-
training at the General Hospital
in Calgary, was home over
the week end.

The weather has been very
warm and drying during the past
week, with temperatures gener-
ally in the 80's.

Donnie and Heather Swallow
are spending the summer
with their grandmother, Mrs.
Munson, at Oids.

Mrs. Pete Nelson, and son
Tony, and wife, of Vancouver,
were guests of Mr. and Mrs.
Bob Milne for a couple of days
last week.

Mr. and Mrs. Kasper Kempf
have as visitors their niece—
Joyce, Mary, and B. Shari
O'Hara, and Mr. and Mrs. G.
Langlois, and family, all of
Edmonton.

Mr. and Mrs. Keith Peters
celebrated their first wedding
anniversary on July 14th at
the home of the former's
parents, Mr. and Mrs. S.
Peters, in Delta.

Mr. and Mrs. Bill Park, and
daughters Anie and Gwen,
of Penitentiary, B.C., were
guests of Mr. and Mrs. Bob
Milne, all last week.

Mr. and Mrs. Bob J. Fries
and family, accompanied by
Mr. and Mrs. Bill J. as and
family, were week end guests
at the home of Mr. and Mrs.
Wm. Hall and family.

P. H. "Floy" left for
Vancouver, B.C., recently, to
meet her son Robert, who has
been training with the Delta
Cadet Corps at Comox, B.C.

Three of World's Four Oceans Bound Canada

Canada, bounded by three of the
world's four oceans and surrounded
by the world's water-land frontiers,
is second in size only to Soviet
Russia; Brazil is the world's third
largest country; and the United
States fourth. To date, less
than one-third of Canada's water-
land frontiers have been developed
to such extent that one of the country
is included as a complete homeland,
and as equal area considered suitable for
farming is still unoccupied.

Such are some of the items of in-
formation contained in the 13th
annual edition of *Quinta Canadiana*,
a book of facts and statistics of
Canada released this week by the
publishers.

Statistics of other facts about
Canada and Canadians noted
on the same book are:

There are fewer than four persons
per square mile of land area in Cana-
da, compared to more than 500 in
the United States.

The most significant aspect in
Canada's population picture is the
trend to urbanization which has ac-
companied the country's great
industrial expansion; manufacturing
now employs about 1,300,000 Cana-
dians compared to about 100,000
employed in agriculture.

In the entire year full-time
employment in Canada is estimated
at 75,000 more than double
the pre-war figure.

In 1955 as compared to 1952 the
value of foreign goods sent to Canada
increased to \$6.7 billion, from \$4.7
billion; the value of Canadian exports
increased to \$4.5 billion from \$4.0
billion.

One of the 75 daily newspapers
published in Canada with a combined
circulation of about 2,300,000, and
about 100 weekly newspapers with
a combined circulation of about
200,000.

The highest earners in Canada are
consulting engineers and architects
who, in most recent figures, for 1954,
had an average annual income
of \$13,000; largest single group of
income tax payers are employees, who
received \$2,001 for the year; next
largest group, business proprietors,
received \$1,071 for the year.

The value of daily newspaper
circulation in Canada with a combined
circulation of about 2,300,000, and
about 100 weekly newspapers with
a combined circulation of about
200,000.

1,000 machines are on hand in the
Employment of England.

of Delta; less than ten miles
out. Small buildings preferred.
High priced land will not be
considered.
ELMER EWING
Hanna, Alta., Hospital.

Farm Wages Up
The average hourly wage of
male help in Alberta at mid-May
was 56 cents without board and
\$1.07 with board, according to
the Dominion bureau of statistics.
These are well above the national
average of 77 cents and 91 cents
respectively. The monthly wage in Alberta
was \$130 without board and \$186
with board. Farm wages were up 10
cents in 1956 and 1957 over 1955.

George John Fitch, B.A., son
of Mr. and Mrs. M. J. M.
Fitch, of Armstrong, B.C.
The wedding will take place
August 17 at All Saints' Angli-
can Church, Hanna, Alta.

In Hungary and Austria, you
are thought of your Canadian
Red Cross.

Future...4-H Club Member

The idea was so good that the young
people swept their parents along with them,
and farm life improved amazingly.

4-H Clubs have found many useful things.
They have kept the right boys and girls on
the farm, trained young men and women
for leadership, improved life in rural com-
munities by introducing better agricultural
and home practices, and implanted the
ideal of good citizenship in young members.

There are about 75,000 4-H members in
Canada. Many will graduate into farm
organizations in which are the progressive
young farmers who—by using modern
machinery and farm techniques—help to
keep old Canadians well fed.
